

WELL! IS THIS GOING ON FOREVER?

What he needs is Postum

Ill-temper, nervousness, sleeplessness — with some people all of these can result from the caffeine in the tea and coffee they drink. They should drink Postum! No caffeine — no other stimulants — and a grand flavor! Easily made right in the cup with boiling water or hot milk. Costs less than a cent a serving.

A Product of General Foods P117

A Tribute To Canada

THE MANNER IN WHICH PEOPLE of many races have come to this country and lived together in peace and harmony as Canadian citizens, stands as an example of what could be accomplished on a much larger scale among the nations of the world. Canadian culture has been said to be an amalgamation of all the best which has been brought here by people from other lands. In Canada, racial prejudices and language and class barriers have been submerged, while much of the finest in music, art and other forms of expression in many divergent races, has combined to benefit the cultural life of this country. Among all ranks of Canadians, statesmen, professional men, educators and those engaged in various forms of the arts, are outstanding citizens whose racial origins go back to all parts of the Old World. Regardless of this, they work together, as citizens of Canada, for the welfare and advancement of the nation.

Is An Example To The World

For many years Canada has been cited as an example of what could be achieved in building permanent peace among the people of the world. The latest tribute of this kind came from the Right Honorable Viscount Addison, British Secretary of State for the Dominions, who recently made an extensive tour of Canada. During this tour, Lord Addison addressed audiences in a number of centres and on each of these occasions he advocated what leading statesmen of all nations are now urging, namely that the interests of the United Nations be held above those of individual states and groups of people, in the cause of an enduring world peace.

The War Taught Need For Unity

Lord Addison emphasized the fact that the war has taught the people of the world the value of unity as a basis for lasting peace. In this connection he said: "All the great projects on which we could make progress, and are doing so as for as opportunity allows, are only possible on one condition, and that is that we have for a basis of every scheme security for the people. I believe every man in every country wants to be able to pursue his life free from the dread of war, and I would like to say that I think the lesson of Canada—in which large numbers of different races, preserving their own ideals and their own teachings and their own languages are living together in a great unity,—is a lesson the world should learn." Canadians should be proud, indeed, to stand as such an example for peaceful co-operation among people at this crucial period in world affairs.

NAZI RICHES MAY BE USED FOR REPARATIONS

BERLIN.—The Allies may decide to use the private fortunes of the Nazis convicted by the war crimes tribunal as part of Germany's war reparations payments.

It was learned that this is one of two plans under consideration in Berlin. The second plan would provide for a fund for "the victims of fascism."

Allied authorities also were reported considering whether to grant subsistence pensions to the widows and wives of the convicted Nazis.

Tin Production

Will Be Some Time Before Output Exceeds Demand

LONDON.—World tin production at some future date "likely" will exceed demand, Sir John Wilmot, minister of supply, predicted. He gave no estimate as to when output of tin would be greater than demand.

"Although present production is substantially below the level of desired world consumption," he told the world tin conferences, "it appears to us that when main tin-producing areas in the Far East are rehabilitated, there may arise a future date position in which potential production will likely exceed the demand."

Record Apple Crop

Okanagan Valley's "Production Is Expected To Be 9,000,000 Boxes

PENTICTON, B.C. — The 1946 apple crop from British Columbia's rich Okanagan Valley will set a new high production record of close to 9,000,000 boxes, fruit authorities at this centre said.

An estimated 2,250,000 boxes are going to the United States and 2,000,000 to Britain.

Okanagan fruit ranchers will be getting a record cash return this year. Estimates were that the total cash return from all tree fruits would be close to \$25,000,000 and possibly approach the \$30,000,000 mark.

The Babylonians had a numerical system based on 60 instead of 10.

POTATOES INCREASE

Yields Of Sugar Beets, Dried Peas And Corn Also Higher

OTTAWA.—Substantially increased yields of potatoes, sugar beets, dried peas, and corn, but a reduction in the output of alfalfa for the 1946 crop season was reported by the Dominion bureau of statistics in its first estimate of root and late crop production for the year.

The 1946 potato crop, the bureau said, was estimated at 47,000,000 hundredweight, and was substantially above the 36,000,000 hundredweight crop of a year ago. Average yield was 90 hundredweight per acre, with New Brunswick having a top yield of 150 hundredweight per acre.

Quebec and Manitoba potato crops were lower this year than last, but the total 1946 Canadian crop is the largest since 1934, with the exception of 1944, the bureau said.

The commercial sugar beet crop for 1946 was 83,000 tons above the 1945 output, the bureau said. The increase was due not only to increased acreages, but above average yields.

Production of dry peas in Canada this year amounted to 2,322,000 bushels, compared with 1,363,000 bushels a year ago. The alfalfa crop was reduced to 3,263,000 tons—617,000 tons less than a year ago.

To Adopt Graves

French People Willing To Care For Those Of Fallen Canadian Soldiers

Graves of Canadian servicemen in the Calvados district of Normandy should not lack for attention if the present plans of the Association France-Grande Bretagne are completed.

The information office of the French embassy in Ottawa has released details of a scheme whereby French families who are resident in the localities where war cemeteries are located will adopt the graves of fallen Canadian soldiers.

They would be willing to look after the general maintenance of the graves, to keep them decorated with flowers and to send photographs. They are also willing to guide the next-of-kin should they wish to travel to France to see the graves.

Whatever care they bestowed on the graves would be in addition to the care that is given by the employees of the Imperial War Graves commission.

Those who are interested are requested to communicate with one of the following representatives, according to the district in which the grave is located.

For the Beny-sur-mer cemetery, Mons: Louis Meriel, 58 Rue de l'Eglise, Courseulles-sur-mer, Calvados.

For the Breteville-sur-Mer cemetery, Mons: Duquesne, Louvigny, Calvados.

For isolated graves in the Calvados department, Mons Gaudin, 14 Rue du 20 Siecle, Caen.

The association has requested that full particulars of the deceased soldier should be sent together with the location of the grave and the request for adoption of that particular grave will be passed on to a French family.

Not Always Reliable

Even If Radar Was Used Air Crashes Would Sometimes Occur

Commercial aviation's most disastrous crash (there have been much worse ones with military airships) occurred when the plane hit a Newfoundland hill.

Most airline accidents are a good deal similar, and the question arises as to why passenger aircraft don't carry radar. The answer says the Detroit Free Press is that radar, while wonderful, is by no means so practical as the enthusiasm of its publicizing has led the layman to believe.

A great deal of costly development is still necessary before it can be adapted to the needs of commercial flying. Maybe a year from now it can be, say the knowledgeable, but not yet.

And even when it is standard equipment there will be occasional crashes. Railroads have signal systems that look foolproof on paper, but now and again collisions still tear Pullmans in two lengthwise.

GEMS OF THOUGHT

METHOD

The first idea of method is a progressive transition from one step to another in any course.—Coleridge.

Method is not less requisite in ordinary conversation than in writing, provided a man would talk to make himself understood.—Addison.

Be methodical if you would succeed in business, or in anything. Have a work for every moment, and mind the moment's work.—W. Matthews.

Method facilitates every kind of business, and by making it easy makes it agreeable, and also successful.—C. Simmons.

The shortest way to do many things is to do only one thing at a time.—Cecil.

The poet's line, "Order is heaven's first law," is so eternally true, so axiomatic, that it has become a truism; and its wisdom is as obvious in religion and scholarship as in astronomy or mathematics. — Mary Baker Eddy.

NEW FASTER ACTING ROYAL DRY YEAST

Add New Fast Rising Royal to water. It starts working in 10 minutes.

New Granule Form Saves Time! Saves Work! Scores New Baking Success!

No fussing with "setting bread" the night before when you're tired and "not up to it." No risk of overnight baking failure because of temperature changes. New Fast Rising Royal lets you do your whole baking in a few hours in the daytime when you can watch the dough.

New Fast Rising Royal stays full-strength, ready for use on your pantry shelf for weeks. Try New Royal Fast Rising Dry Yeast today. At your grocer's.

4 packets in each carton. Each packet makes 4 large loaves.

Ogden's FINE CUT

POPULAR WITH CHILDREN

Milk powder is being flavored and colored and put up in tablets and bars in Britain by the Ministry of Food in an effort to increase the consumption of milk. School children in Scotland, who tried them, were enthusiastic over them. Their favorite flavors were chocolate, raspberry and almond.

Musk, a fixative, is the most important single material used in perfumery.

Seek Uranium

Australian Scientific Expeditions Organized For Three-Year Survey

ADELAIDE, South Australia.—New deposits of uranium in South Australia are sought by scientific expeditions recently organized by the South Australia government for a three-year survey of the state's mineral resources.

The expeditions will make detailed surveys of existing deposits, the largest of which is near Mount Painter, in a treeless, waterless hill range, 400 miles north of Adelaide.

Under recent federal legislation known uranium deposits or any new ones that are located are automatically federal government property.

FOOD FOR BRITAIN

MELBOURNE, Australia.—Weighted down with 10,800 tons of food for Britain, the 10,000-ton freighter Orari drew more water than the 35,000-ton British battleship King George V when she sailed recently. Thirty-four feet of her hull were below water and only seven feet above.

GROW BIG SQUASHES

BRANTFORD.—They grow them big around these parts—squashes, this is. Two exhibited at the Paris fall fair recently weighed 75 pounds each.

BUGS BEST FLIERS SAYS DETROIT ENGINEER

LOS ANGELES.—William B. Stout, an engineer, debunked the notion that birds were nature's best fliers. He said bugs could fly circles around them.

Even the common house fly can fly better than a bird, Stout said.

"Did you ever see a bird that could land upside down on the ceiling?" he asked.

Stout, a Detroit consulting engineer, showed the Society of Automotive Engineers' national meeting his version of the oriole, a flap-winged airplane built to fly like a bug.

Galileo looked at the moon with the first telescope used in astronomy in 1609.

**MANY FIELDS DAMAGED
BY WATER EROSION**

Water erosion control is just as important as wind erosion control in many parts of Alberta, particularly in the foothills area where rainfall is somewhat heavier than on the open prairie and where sloping fields are prominent. Green, serious have been made in wind erosion control during the past ten years but water erosion still washes away surface soil cuts gullies in fields. The net result is loss of valuable top soil and inconvenience in field operations. In conveniences include inability to use machinery in low wet places, delays in seeding and delays in hay making.

There are three fundamental methods of preventing water erosion: (1) keeping the soil covered with crops or plant residue such as stubble, (2) preventing water from accumulating into streams, (3) seeding down drawways to erode. It may be

necessary to keep excessively steep lands in grass while every effort should be made to preserve trash covers on any fallows located on sloping fields.

Water can be prevented from accumulating into streams by contour farming or a combination of both. Drainage ways that usually carry a considerable volume of runoff water should be seeded to grass.

Successful progress in the control of water erosion has been made at the Panther Creek Substation. A field of 2.4 acres has been farmed on contour for the past six years with very satisfactory results. Three years ago a draw about half a mile long on another part of the farm was seeded to brome grass. Profitable crops of both hay and seed have been grown on this grassed drawway.

It is predicted that more attention will be given to water erosion on many farms in the immediate future.

New Use For Peat

Scientists Find It Substitute For
Wax Obtainable Only From
Germany

A United Kingdom wartime discovery may create a new industry. An investigation was undertaken by the British Department of Scientific and Industrial Research to find a substitute for montan wax, hitherto obtainable only from Germany. The properties of this wax, such as its hardness and high melting point, make it suitable for use in the preparation of many polishes and carbon paper. It was found that peat is relatively rich in this and other forms of hard waxes—from 3% to 12% of the dry substance can be recovered as crude wax. After the wax has been extracted the peat can still be used as fuel, either in powdered form to provide power on the site or made into briquettes for use as fuel.

GO T HIS WORD IN

Nobody seemed to take much notice of Brown. He tried to get in a word now and then, but somebody with a stronger voice always took command of the conversation. At last the talk turned on the subject of dogs, and Brown felt sure that his chance would come, for he owned a dog of which he was proud.

"There are some dogs," remarked Robinson, "that have more intelligence than their masters."

"That's quite right," said Brown; "I've got one like that."

Canada's Food Products

Estimated Market Value Is Close To
100 Million Dollars

Can you imagine a column 50 feet square and extending 20 or more miles above the earth, containing, of all things, nothing but fresh fruit and vegetables? If such a column were possible it would represent the fruits and vegetables consumed annually in only two large Canadian cities.

Dr. W. C. Hopper, B.S.A., M.S., principal economist in the Economics Division of the Department of Agriculture, Ottawa, visualizes such an apparition in preparing a report for the Canadian Geographical Society on the production, importation and marketing of these food products. What such a column would be like if it included the total Canadian consumption of these commodities would be difficult to imagine.

The report states that the annual Canadian production has a market value of close to 100 million dollars. In addition to Canadian-grown products, prior to the war fruits and vegetables were also imported from 20 different countries, including the United States, South America, Italy, Palestine, Spain, the West Indies, South Africa, Mexico, Egypt and Australia. Importation from such countries is now being resumed and, according to Dr. Hopper, may eventually become greater in quantity and variety than ever before. The import value of fruits and vegetables from the United States alone is more than 60 million dollars annually.

Dr. Hopper, who pays tribute to the important distribution role played by public markets, some of which were established as long as 300 years ago, believes, however, that improved public market facilities are urgently required.

Most fruits and vegetables grown today, he adds, are the descendants of wild plants discovered hundreds of years ago. Scientific effort over a long period of time has brought their growth, texture and flavour, as well as nutritional value, to their present high standard.

Historic Elm Lining

Something Unusual In Captain's Cabin On Liner Queen Elizabeth

When the captain of the Queen Elizabeth returned to his cabin, he was surrounded by more than memories of London's historic Waterloo Bridge. According to Cunard-White Star officials, the cabin has been lined with elm obtained from piles driven in 1811 under the original Waterloo Bridge over the Thames. The bridge, opened on the second anniversary of the Battle of Waterloo, was torn down in 1936. The bleaching action of 125 years of swirling Thames water has turned the elm's original color to a rare shade of gray which has been held in its natural state.

WORLD HAPPENINGS BRIEFLY TOLD

The Earl of Athlone has resigned as colonel of the 7th Queen's Own Hussars.

Six "magnified chestnut burrs" have arrived at the Lincoln Park Zoo, Chicago, from London. They are tiny hedge-hogs that roll into a ball and bristle when frightened.

Princess Elizabeth has become president of the Royal Merchant Navy School of which the King is patron.

The Moscow radio, reported that homes have been provided for 3,000,000 persons in the last three years in areas of Russia devastated by Germany.

The great east window of Gloucester Cathedral, largest of its kind in England and removed for safety during the war, is being replaced.

Gen. Dwight D. Eisenhower, United States army chief-of-staff, was honored at a dinner given by Prime Minister Attlee at 10 Downing street.

During the war Sheffield University students worked in laboratories three shifts a day testing forgings for tank parts and metal sheets for steel helmets.

Making naval history, Capt. H. W. Faulkner used a helicopter to fly from his ship, H.M.S. Triumph, to Sheerness, to a naval parade ground at Chatham, Kent.

Lectures and motion pictures dealing with food handling, personal hygiene, communicable disease and sanitation have started in Calgary for food dispensers in the city.

Teachers From Britain

Exchange Teacher Thinks Children
Are The Same Everywhere

TORONTO.—The only Welsh teacher in a group of 20 from Britain now teaching in Ontario, Miss Constance Pugh said recently that "kids are much the same everywhere." Six other British teachers are in Toronto and the rest are scattered throughout Ontario. All women, they are here in exchange for Canadian teachers sent to Britain.

"I think this exchange system is a wonderful idea," said Miss Pugh.

"Your whole educational system is entirely different to ours. Our schools are divided into so many more sections. The courses of study are different as well as the names of subjects. I expect I'll have a lot more homework than just preparing next day's lessons."

HOMELESS HEIRESS—Mrs. Edna Clait, 22, of Augusta, Ga., smiles at news she inherited \$265,000 from her grandfather. She says she's staying on her job with the city health department, and what's more, she still needs an apartment for herself and her marine veteran husband.

Honey Production

Ontario Apiculturists Report Only A
Twenty Per Cent. Crop

GUELPH, Ont.—The traditionally busy bee went on a work stoppage in Ontario this summer and apiculturists have garnered only a 20 per cent. crop in the Dominion's banner honey-producing province.

Official reports to the Ontario Agricultural college here indicate a yield of from 2,400,000 to 3,900,000 pounds compared with normal production of 11,000,000 to 19,000,000. In good years it is much higher—the 1938 yield, best in recent years, amounted to 24,092,000.

The situation stumps the experts. But Ontario isn't alone. Dominion government officials in Ottawa report that the honey yield is below normal all through eastern Canada.

In the west Manitoba and Saskatchewan have a normal yield. Alberta has the biggest drop in its history and British Columbia has a good yield.

How to Combat RHEUMATIC PAIN

Rheumatic pains may often be caused by excess uric acid, a blood impurity that should be extracted by the kidneys. If kidneys fail, and excess uric acid remains, it may cause severe discomfort and pain. Treat rheumatic pains by keeping your kidneys in good condition. Get and use Dodd's Kidney Pills. Dodd's help your kidneys get rid of trouble-making poisons and excess acids—help you feel better. See what Dodd's can do for you. 157

Canada's Air Force

For Stamp Collectors

There Will Be No Women In The
Permanent Force

There will be no women in Canada's permanent air force, according to an announcement made by the minister of defence for air, Hon. Colm Gibson, in Toronto recently. The women's division will be totally demobilized by the end of this year.

Permanent air force will number 16,100 men, he said. "We shall never be caught without sufficient instructors and an immediately available fighting air force again," he added.

The R.C.A.F. will have nine squadrons, including two bomber squadrons, two fighter, two photography, two transport, one army co-operation and one communication flight. Two auxiliaries will be available for immediate action, while in addition a reserve will be on call in time of emergency, the speaker said.

Australia Has Special Service Which
Would Be Appreciated
Anywhere

For the first time in Australian post office history, the eager and fastidious stamp collector can post his letters, secure in the knowledge that the stamps will not be defaced in the post-marking. In Sydney, a new mail-box has been added with the classification—"Philatelic Mail Only."

Post office authorities explained that the ordinary machine post-marking was sometimes too heavy for the requirements of philatelists. Letters placed in the special box will be carefully stamped by hand. Since the box was installed, an average of 11 letters a day have been posted. 2695

Canadian Navy Launching Fall Recruiting Drive

OTTAWA.—The Royal Canadian Navy, emerging from its war and post-war duties as the biggest and best sea force in Canada's naval history, is looking for 3,000 young Canadians to man its ships and see the world.

Offering better pay, better opportunities and better accommodation than ever before, the navy is launching a fall recruiting campaign aimed at bringing its permanent force strength up to the authorized total of 10,000 officers and men.

Running side by side with the permanent force campaign will be a drive for some 16,000 recruits to boost the strength of the part-time navy—the reserve—up to the authorized 18,000 peak. These men will train evenings on modern equipment in the 19 naval divisions across Canada and spend two weeks afloat during the summer.

The army now has recruited 12,000 to 13,000 of its authorized peacetime force of 25,000 while the R.C.A.F., with a goal of 16,100, has accepted more than 9,100.

The naval recruits will man the more than 50 ships—minicraft carriers, cruisers, destroyers, frigates and escort vessels—which make up the new peacetime navy, which looms as a formidable fighting force when compared with the 13 vessels that were ready for active service when war broke out.

To date, enlistments in the reserve total 1,800 against the 18,000 men required but this is mainly due to the fact recruiting has been concentrated on the full-time force, which now includes some 7,000 officers and ratings.

For its permanent force, the navy mainly draws its recruits from a number of sources—ex-naval personnel, men with service in the other forces, sea cadets and the Royal Canadian naval college.

Rates of pay and standards of naval life have been made more attractive in the last few years.

For instance, the lowest rating—ordinary seaman—now begins his service at a rate of \$50 a month against \$37.50 in the pre-war navy and at the end of six months his pay is increased to \$54 against an increase to \$45 formerly. This is tax-free and in addition food, clothing, shelter and dental and medical care are provided at no extra cost.

Accommodation has been improved. Peacetime components of ships now are about four-fifths of wartime complements, which means that overcrowding on board has been eliminated.

There also is the new "home port" system, under which men from eastern Canada are posted to eastern bases and men from western Canada are based at the Pacific coast. Married men are given every possible opportunity to live with their families.

Extended cruises, such as the voyage of the cruiser Uganda around the tip of South America last year, will be the practice for permanent force training. Reserve men will go on shorter cruises.

CANNOT CRITICIZE

Allied Control Authority Issues New Code For Occupied Zones

BERLIN.—German newspapers and politicians in all four zones of occupation are forbidden to criticize the decisions of Potsdam and any future conferences of the Allied powers on Germany in a new directive published by the Allied control authority.

The new code also prohibits spreading of nationalistic and pan-Germanic ideas and the dissemination of rumors aimed at disrupting unity among the occupying powers. Within the bounds of military security, the New directive permits the German press and politicians the following liberties:

"Free discussion of German political problems.

"Comments on the policy of the occupying powers in Germany.

"Publication in German papers of factual information on world events including informative articles taken from the foreign press."

CROP REDUCED

LONDON.—Reductions in British crop production as a result of abnormally wet weather in August and September were indicated in the agriculture ministry's 1946 yield forecasts. On 2,000,000 acres sown to wheat the estimated yield will be 17.7 hundredweight an acre compared with 19 last year.

HAS PUBLIC APPROVAL

PARIS.—A constitution for France's fourth republic, providing for a powerful legislature overshadowing the president, bore the stamp of public approval, given in the face of Gen. de Gaulle's opposition. The people of continental France accepted the new constitution by a margin of some 1,212,000 votes.

More than half of Bolivia's people are pure-blooded Indians.

HELD BY YUGOSLAVS—Yugoslavia has released Robert Burnup, UNRRA construction engineer from Independence, Mo., and he has left the country, fulfilling the condition on which he was freed. He was held in Belgrade on charges of espionage against the Yugoslav army.

AID FROM BRITAIN

Help Given Allies On Friendly Neutrals Revealed In White Paper

LONDON.—Hugh Dalton, chancellor of the exchequer, said in a white paper that Britain's mutual aid to 14 allies or friendly neutrals from the summer of 1941 until the autumn of 1945 aggregated £2,078,500,000 (\$3,314,000,000), of which 60 per cent., or £1,247,100,000 (\$4,965,600,000) went to the United States.

About 15 per cent of the total—£318,000,000 (\$1,272,000,000)—was received by Russia, and the rest by France, Poland, Greece, Czechoslovakia, Norway, Belgium, the Netherlands, Yugoslavia, Denmark, Turkey, Portugal and China.

The paper—third of its kind to be issued—said that at the height of the war the United Nations were aiding one another on a scale of about £4,500,000 a year, "a figure not far removed from the total value of world exports in a good pre-war year."

Nations Prepare For World Trade Conference

LONDON.—Seventeen nations began here the task of freeing the world from the shackles imposed by the war.

Basis of the conference, which a 10-man Canadian delegation is attending, is the formation of an international trade organization designed to stabilize and expand world trade. The present meeting is essentially preparatory for the full world trade conference which is scheduled to meet some time next year.

Decisions made at the present meeting will be of paramount importance. The delegates have been given the task of preparing an "annotated agenda" for the main meeting. They will be asked to draw up a convention covering the main points in the U.S. proposals. These are:

(1) An undertaking by the lending countries to maintain a high stable employment; (2) reduction of tariffs and elimination of preferences; (3) control of cartels; (4) provision covering the primary commodities.

Already talks between the British commonwealth countries have shown grave difficulties. The feeling exists among some of the non-industrialized countries that the U.S. proposals will prevent them building up industrially by depriving them of tariff protection. The primary producers, such as Australia and New Zealand, are doubtful whether they will be able to hold British markets without the protection of empire preference.

BAN LIFTED

LONDON.—The ban on employment of married women in the British home civil service has been abolished, Hugh Dalton, chancellor of the exchequer, told the house of commons.

RETURNS TO STRIFE-TORN GREECE—Back on the Greek throne, King George II, seen chatting with the Duchess of Kent as he left England, has to cope with insurgent troops fighting in northern Greece.

RECORD HONEY CROP

EDMONTON.—Topping all other provinces in the Dominion, Alberta this year will produce about 6,200,000 pounds of honey to establish a new all-time record. W. G. Le Maistre, provincial apiarist, announced, Manitoba is expected to rank second in this year's crop with approximately 5,000,000 pounds.

RETAINING CONTROLS

Prices Board State Prices On Meat To Stay

OTTAWA.—Top officials of the prices board, in the temporary absence of Donald Gordon, chairman, said most emphatically that the removal of U.S. price controls on meat will not have the slightest effect on the Canadian policy of retaining these controls.

"There is no intention, whatever, of lifting meat price controls, now or at any immediate time in the future," said one of Mr. Gordon's chief assistants.

This official did not think, either, that there would be much smuggling of Canadian cattle across the sparsely guarded border in Manitoba, Alberta and Saskatchewan to take advantage of soaring U.S. prices. There was no smuggling to any extent when the U.S. temporarily removed meat price controls last summer and U.S. meat prices went sky high. The American stockyards quickly became filled with cattle and the prices rapidly fell though not below the former O.P.A. controlled prices.

HIGH PRICED

Hereford Bull Brings \$35,000 At Auction Sale

CHEYENNE, Wyo.—A top price of \$35,000 was paid for a Hereford bull Monday at the annual sale and auction of the Wyoming Hereford ranch, which attracted stockmen from 40 states.

W. E. Boelag of Seattle, Boeing Aircraft company executive, paid the price for a prize-winning bull known as "WHR Roy Helmsman." The highest priced bull at last year's sale was \$27,500.

Temple Bar, marking the western limit of the City of London, was a stone house above which the heads of traitors used to be exposed. It was torn down in 1878.

FLEW FROM GERMANY TO MOURN DEAD—Funeral services for the 39 persons killed in the American overseas airliner crash in Newfoundland were conducted in a plane over their mass grave while relatives, flown from Frankfurt, Germany, mourn the dead. Grave is marked with crosses, Stars of David.

Gen. Eisenhower Is Godfather To Air Chief Marshal's Son

Guests of the King and Queen at a ball in Balmoral Castle, Gen. and Mrs. Eisenhower, left, seen following the christening of the infant son of Lady Tedder, who holds the baby, and Lord Tedder, right, Britain's air chief marshal, attended church service with Their Majesties. Gen. Eisenhower is godfather to Lord Tedder's son.

Concern Felt Over Delay Of Reparations

BRUSSELS.—The inter-allied reparations agency here, of which Canada is a member, is increasingly concerned over serious delays in the allocation from the three western zones of Germany of war-making industrial equipment for reparations.

Some leading delegates on the agency express the belief that unless payments are speeded up eventual efforts to collect them will be effectively resisted.

While the Allied control council in Berlin selects the plants to be dismantled and shipped from Germany as reparations, it is the Germans themselves who do the actual work.

It would not be difficult for them to upset the process, although so far they haven't tried.

"The anticipated method would likely be a sort of passive resistance on the part of the Germans to reparations payments," one source said. "If it became well organized it would be very serious."

Current delays, however, are due largely to disagreements in the Allied control council. Of about 700 plants which are likely to be marked for reparations, only 70-odd have been assigned by the council to the I.A.R.A. for allocation to its 18 members, who include all Allied belligerents in the European war with the exception of Russia and Poland. The latter get the bulk of their industrial reparations from the eastern zone of Germany.

One authority said the reparations machinery of the control council should be overhauled as soon as possible to enable the council to assign plants rapidly to the agency here and let them dispose of them promptly.

Several moves are expected shortly to put pressure on the control council in an effort to straighten up this reparations difficulty.

Europeans In Constant Fear Of Another War

(By Ross Munro)

PARIS.—From Paris to Berlin, millions of people, in despair, cynically at the hard-won peace, are seriously concerned over the possibility of war between the Russian group and the western nations.

The disputes at the peace conference here, the creation of a semi-military frontier down the length of eastern Europe from the Baltic to the Adriatic, the never-lessening tension, and the terrifying degeneration in relations between east and west in Europe provide an alarming picture to Europeans, living in a traditional battlefield.

Fears that haunt Europe are compounded of a spate of loose and frequently irresponsible talk of war which has increased during the last three or four months on the continent.

In three typical cities of western Europe, Paris, Berlin and Brussels, I've heard over the last few months unfeigned, inflammable war talk that makes one's skin creep. It is as depressing a development as Europe has seen since the end of the last conflict.

The really serious aspect is that you now meet scores of people, some in responsible positions, who seem to accept the inevitability of war with the Soviet.

In Berlin, a senior officer spoke openly of the probability of a fight. Another expressed sincere concern to me as to how he would get his wife and daughter out of the city in time before the "balloon went up."

Belgian friends in Brussels, one of the most prosperous and settled capitals of Europe, talk with bewildering alarm of the outlook in Europe. When Hon. Brooke Claxton, head of the Canadian delegation to the peace conference, was here in September he was given a reception. Within 15 minutes, three Belgians asked him whether he thought there would be another war before long.

The Paris conference itself has hardly been a peace conference. Suspicion, distrust, stubbornness and fear have dominated its proceedings from their beginning. In private, war talk is mixed with peace talk among the delegates.

Europe however, is not without its optimists. They argue that the continent's marathon crisis will eventually resolve in stable settlements.

RESCUES OWN BROTHER

BIRCHINGTON, Kent, England.—Through his telescope former Sub. Lt. Tony Garner, 21, saw two small boys clinging to an overturned canoe in the channel. Swimming to their rescue he discovered them to be his brothers—Peter, 10, and John, aged 13. They were exhausted when he reached them.

MY WEEK

by R. J. Deachman

I have a grandson about seven years old. He has a chin who is like a hammer. He has the tendency to hiccup. I have a remedy to cure him. I have a glass of water to take away those hiccups. "No thank you," he said, "I like them".

There are a good many people in Canada who are like that boy. They like to see things happen but they failed to consider that they would be the sufferers in the end.

We are just beginning to harvest the fruits of many wage increases and they are more or less unpleasant. There was a very distinct and positive howl made when the price of agricultural implements went up. The net result of that was an increase in farm operating costs. Then followed an increase in the price of milk and the hawking was on the other side of the street. The people who paid the price did the kicking. They could stand increases which fell on other but when personally affected they were distinctly vocal.

Now another increase looms largely on the horizon. For some time railway wage rates have been moving up. The cost of materials used by the railways have increased sharply, are likely to continue to increase, the result will be higher freight rates affecting our export market, affecting cost of production in Canada, probably increasing our basic rate, it is something which affects all the people of the nation.

But will you tell us what can be done about it. If costs rise so will prices. The temporary gains which one group receives are soon lost in the general price advance. I think I am safe in saying that a general wage increase has never increased the total earnings of labor any time in Canadian history. On the other hand a reduction in the price of products can be very effective in the promotion of prosperity. This occurs when the reduction takes place through technological change which lowers the cost of production and permits a lowering of price and thus an expansion of markets.

There is one thing on which we should keep a steady eye, the relationship between the price of farm products and the price of manufactured goods. Higher prices of farm products and higher general increases in wage rates may not produce any noticeable effect, but the greatest danger we face today is the prospect of possible reductions in prices. The next few years will be a certain. When that happens, there will be marked distortion in earning power. The cost of living will fall, wages will remain high, the price of farm products will be low and cost of production high. When that movement starts it will be the signal for hard times. It is the one problem to which

we should now give our closest attention. It should receive the consideration of statesmen, farmers, labor leaders and all those who have an interest in the ultimate welfare of the nation. It will call for courage and breadth of mind—balance in the economic life of the nation is always an essential asset.

It is the biggest danger confronting us in the next four or five years.

Mr. Smith and the Legion...

The Legion is composed of Canada's best citizens. It exists to serve ALL Canadians.

Young Mr. Smith is going back to school. Young, only 27, yet pretty old for high school. It's going to take courage. But Mr. Smith proved his courage when he was Private Smith, a Bren-gunner. Young Mr. Smith is going to amount to something.

Behind him stand his Legion comrades. Proud of him and determined to see that he has every chance.

YOU NEED THE LEGION!

THE CANADIAN LEGION

THE LEGION NEEDS YOU!

Take home groceries?
Golf date?
Pay rent?
Flowers?
Wife's birthday?

Ahhhhh!...
Canada Savings Bonds

There is still time to buy Canada Savings Bonds - but don't wait for a representative to call on you. There will be no national house-to-house canvass - these are "Serve Yourself" Bonds, so it is up to you to make sure you buy.

Buy them through your Bank, Investment Dealer, Trust or Loan Company, or through your Payroll Savings Plan. They are safe as Canada - pay good interest - and you can get your money back at any time.

GASOLINE TAX BIG

REVENUE PROVIDER

The gasoline tax is continuing to pour millions of dollars into the Alberta treasury, running in second place to liquor profits, according to reports received from the provincial government by the Alberta Motor Association.

Last year liquor profits yielded in the neighborhood of \$8 million and probably will be equalled this year. During the present year, the gaso-

line tax revenue is expected to run \$5,000,000, which will be a record for the province and well ahead of the previous year.

While there has not been a great increase in car registrations over the previous year, cars have been in greater use since the removal of all wartime restrictions on gasoline in August 1945.

The fact that the province is obtaining such a large revenue from the gasoline tax is expected to intensify demands of the A.M.A. that all motor revenues be expected entirely on the construction and maintenance of highways.

This whole situation is expected to be taken up when the annual meetings of branches of the A.M.A. in

OUR COMPLETE
SHORT STORY—UNCLE JOE GETS
A FALL

By M. T. COLLINS

Copyright
Wheeler Newspaper Syndicate

UNCLE JOE has more complaints than half a dozen ordinary men. There's not an ache or pain that man's burdened with but he's sure to catch it or be sure he's going to catch it. Rheumatism and his heart are his favorite ailments. Then he has his seasonal maladies, such as hay fever in summer and for the least thing during the winter, he's sure to catch a "dost of a cold."

In the kitchen the eight-day clock is almost crowded off of the large shelf with his medicine bottles, pills and potions; but going to a doctor was something he wouldn't even consider.

Aunt Martha doesn't pay very much attention to all his moaning and groaning, she's been listening to it for years. She claimed anyone that ate as much as Uncle Joe couldn't be very sick unless it was from indigestion.

He had just finished his annual spring tonic, an obnoxious smelling mixture made up for him by an old Indian that lived in the Big Swamp. It was supposed to clear up his liver, and, consequently, he was feeling in fine fettle.

"I'm going to do a little repair work on the barn," he told Martha sprightly. "I won't be starting work on the land until the hired man comes next week."

Martha nodded, busy making a pan of biscuits.

About an hour later she went outside to see how he was getting along and found him perched precariously high on the barn roof.

"Now you be careful, Joe Quinn!" Aunt Martha scolded sharply. "You're a long ways up in the air on that barn roof."

Uncle Joe moved his creeper to a new position but did not deign to answer and nailed a shingle in a spot where the rain might leak through.

are you tryin' to do?" He roared, "Git rid of me? I only fell off the roof. I'm as healthy as anyone."

"Yes, you most certainly are! And you fell on the strawstack," Aunt Martha spoke. "You're not even hurt. The doctor says you're the healthiest specimen, he's ever examined. You, you," she was really mad, "old faker!"

Uncle Joe looked flabbergasted, all his little subterfuges were being torn down.

"I'm through mollycoddling you!" Aunt Martha stormed. Then she suddenly laughed and stooping, kissed his bald spot. Whatever she said made Uncle Joe chuckle, but we didn't hear, because we were going out the door.

Fashions

4952
SIZES
12-20

By ANNE ADAMS

You'll Want This!

Here's the fashion star of the new season... a smart and becoming dress you can sew yourself! Pattern 4952 has a keyhole neck, gathers at twin shoulder yokes.

This pattern, easy to use, simple to sew, is tested for fit. Includes complete illustrated instructions.

Pattern 4952 comes in sizes 12, 14, 16, 18 and 20. Size 16 frock takes 3 yards 38-inch fabric. Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

SMILE AWHILE

"What has your boy learned of school thus far this term?"

"That he'll have to be vaccinated, that his teeth aren't really mates, that his teeth need replacing, and that his method of breathing is entirely obsolete."

Mr. June Wed.—"What's wrong with this ple crust, darling? It doesn't half cover the pie."

Mrs. June Wed.—"I asked your mother how to make pies to suit you and she said to make the crust very short."

Chaplain—How could you have the heart to swindle people who trusted you?

Prisoner—But, Parson, people who don't trust you can't be swindled.

"Now, then, young man," demanded her father irritably, when he called for the tenth time, "what do you want with my daughter?"

"With her, sir? Well you know best what you can afford."

"Do you smile at your troubles as I advised you?"

"Yeoh," and the boss warned me three times to wipe that silly grin off my face and get to work."

Kentucky paper: "Anybody around my chicken house in the night will be found there in the morning."

Friend—But isn't your son sort of listless, Mr. Moneybags?

Mr. Moneybags—Heavens, no; he has a list of blondes, a list of brunettes, and a list of red heads.

"The maid is reading our mail, dear," said the wife.

"How do you know honey?" asked the husband.

"Because," replied the woman of the house, "she went and baked a birthday cake right after the mailman brought you a greeting card from Aunt Alice."

Magistrate: "You are sentenced to pay a fine of ten guineas, plus five guineas cost. Have you anything to say?"

Offender: "Rather. And if you promise not to increase the fine, I'll say it."

PROPERTY DAMAGE

Canada Experienced 52,173 Fires
During 1945

In the year 1945 there were 52,173 fires in Canada causing a property loss of \$41,903,020, according to figures released by Dominion Fire Commissioner W. L. Clairmont, Ottawa.

Across the country the greatest cause of fires was carelessness of smokers. This fault caused 17,582 fires with a loss of \$2,286,430.

An even greater property loss was caused by defective electrical wiring and appliances. These accounted for a loss of \$3,813,153.

Close behind in the list came fires caused by stoves, furnaces, boilers and smoke pipes. These caused 5,464 fires and a loss of \$3,097,785.

Overheated chimneys and flues were responsible for 3,708 blazes, hot ashes, coals and open fires produced 2,558 and sparks on roofs meant 1,262 calls for Canadian firefighters.

Other causes of fire were gasoline explosions, lights other than electric, spontaneous ignition, matches, fireworks, friction and incendiarism.

Life Span Of Fish

Cannot Be Told Accurately But
Records Give Some Indication

How long do fish live, if left alone? It is not easy to take accurate account of fish, because they live under the water; but some records which are useful, at least as indications. The New York Aquarium has a record of striped bass living for twenty years, large-mouthed bass living for eleven years, and whitefish which reached fifteen years.

London Zoological Gardens had a lungfish which reached nineteen years, and there are unverified accounts of European trout which lived for fifty-three years in captivity.

Eels in aquariums have lived for fifty-five years. Studies of salmon show that the rate of growth and age of a fish may be judged from the scales.

Robbed of Sleep by
Rheumatic PainBut No Pain Now—After
a Few Weeks of Kruschen

A woman's gratitude at being rid of "such dreadful pains" caused her to write this letter:—

"I used to have such dreadful pains in my knees, ankles and shoulders, to say nothing of my back, which used to feel as though it would break. I had no ease, especially at night... but since taking Kruschen Salts for a few weeks only, I feel a different woman, thank goodness. I have no pains now. I feel much brighter and better in every way, and shall certainly continue with Kruschen." (Mrs. M.H.)

Most rheumatic pain and swelling is caused by too much uric acid in the body. These painful deposits settle in the muscles, joints and tendons, irritate the nerves, and inflame the tissues. Kruschen Salts acts on these pain-making deposits by helping your system to disperse them and to pass them out of your body. This relieves the pain and if you are wise, you will continue with the little morning dose of Kruschen as a help against further attacks. Try Kruschen for the relief of rheumatic pains and lumbago. 25c and 75c at your nearest drug store.

Creates New Art

Woman In Australia Uses Colored
Wools To Make Beautiful
Pictures

Twelve years ago Miss E. M. Richardson, an Englishwoman living in Australia, became interested in making pictures, not with oils or water colors, but with silks and wools.

Today she has developed a new art: her pictures, painted with Australian wools, are full of life color and have fine perspective. She has done pictures of such personalities as John Masfield, Edward Greig, Jean Sibelius and Thomas Edison.

Black and white portraits such as she does have never been done before, and few people have attempted landscapes in colored wools. She says that she cannot paint and has no other interest in art, yet her Australian scenes and misty-green English landscapes appear at a distance to be done in oils.

Indian Harvest Time

Mennt Season For Hunting And
Festivities Would Soon Start

Autumn was the time at which the Indian warriors returned from raiding enemy camps and the traders from traffic with their allies. The women of the tribe by now were busily engaged in harvesting the maize and storing it away. One interesting Mohawk family group in the Ontario gallery of the Royal Ontario Museum shows the members hard at work, the men making bows and sap troughs, the women pounding maize into flour and weaving baskets. All looked forward to the time when the fall tasks were completed, and the rest of the year could be devoted to hunting, fishing and festivities.

"HOUSE FOR RENT" AD

BRINGS NEAR RIOT
PITTSFIELD, Mass.—The first "for rent" advertisement carried in the Berkshire Eagle in two years resulted in a near riot in front of the home of Mrs. Benedeto Cimino, the advertiser.

A line of cars formed that completely blocked traffic. Apartment seekers pushed and shoved their way to the Cimino front door. More than 200 telephone calls were received the first day. When it was announced that the apartment had been rented, several broke down and cried.

Diamond cutters, who serve at least a two-year trial period before being trusted with a good gem, practice diamond cutting on potatoes.

It Could Be Done

Not Too Much To Hope United
Nations May Yet Outlaw War

Gen. Eisenhower says he thinks the time has come when humanity is intelligent enough to do away with war. He says both the atom bomb and war itself should be outlawed.

Gen. Eisenhower's sincerity is not open to doubt, comments the Buffalo Courier-Express. If his sincerity and faith in the intelligence of humanity could be infused into all United Nations delegates, something constructive would result.

Inasmuch as the people of no nation want war, it shouldn't be beyond the realm of possibility for the United Nations to take action designed to outlaw war effectively—and this time for keeps.

It may be too much to hope, but we are not yet ready to concede that.

WOULD BE SOMETHING

First it was a gazelle boy who would run 50 miles an hour, and now it is six gazelle boys, each of whom can run faster than the preceding one. For our part, says the St. Louis Post-Dispatch, we are waiting for a gazelle boy who can run as fast as a rumor.

In Stuart days, it was the custom to put a piece of toast in the wine cup for flavor; hence the English expression, "drink a toast".

ROBERT BRYNER HONORED

A special treat is in store for
Robert Bryner, 15 year old son of
Mr. and Mrs. W. H. Bryner of Price
when he, along with 27 other Eagle
Scouts will participate in ceremonies
at Boulder Dam commemorating the
tenth anniversary of that immense
structure's completion. The celebra-
tion is scheduled for October 22, 23
and 24, and is under the sponsorship
of the State of Nevada.

Twenty eight top notch Eagle
Scouts from the western states will
receive free air transportation from
a central point to the Nevada fete
and will be returned to that same
point on October 24. No expense to

LONDON DISPLAYS THE BICYCLE OF THE FUTURE—

The cyclist of the future will be able
to freewheel up hill on the United
Kingdom designed bicycle now on
view at the "Britain Can Make It"
exhibition. This machine, which was
specially built for display at the ex-
hibition enables the cyclist to: time
in to a miniature radio while he ped-
als, signal his approach by pressing
an electric bell button, brake with
a twist of the handlebars and oper-
ate built in lights in the mudguard
by pulling a switch. "Built in" was
one of the operative words in the
designing of this streamlined bicy-
cle. It applies to every part of the ma-

chine from the instrument panel to the
tool bag and pump. A Yale type anti-
theft lock and concealed parking
stand are part of the fittings. The
most remarkable feature, however
is the unique combination of pedal
and electric power. The machine em-
ploys shaft propulsion instead of a
chain drive and a battery concealed
in the framework gives power to the
cyclist going up hill—he can free
wheel a thousand yards up a one in
ten gradient. The bicycle is 15 per-
cent lighter and will be appreciably
cheaper than the present day mach-
ine. It will not be going into com-
mercial production however for sever-
al years.

CONGRATULATIONS

And a most sincere thank you,
to the Fire Department, who so
quickly stopped the fire, and to
the Townspeople, who aided in
moving our equipment and furniture
from the fire zone.

PLACE SAFETY LINE ON MAIN HIGHWAYS

Alberta is to have a white con-
crete strip on its main highways as a
further precaution against accidents,
according to information received
from the Alberta Motor Association. This
new marking will commence in the
southern part of the province and
will be advanced as far as possible
during the current season.

Provincial officials feel that the
centre strip which is used exten-
sively in the U.S. will be a distinct
aid to safe motoring in the province.
Another step is to place a layer of
light sand on the blacktop surfacing
of main highways. This is expected
to meet the objections of motorists
to the blacktop which, they claim
had the effect of deadening the effect
of headlights. With a fine sand in
use, the lights will function more
efficiently when a car is being oper-
ated over blacktop surfacing.

Provincial officials also say that
the sand will be worked into the
blacktop and serve to improve and
strengthen the surface before the
final hard surfacing is laid.

SASHA DAVIDSON, CBC Women's
commentator, can claim the title of
"cosmopolitan". She was born in
Dartmouth, went to school in Russia,
and was married in China. To add to
her international outlook, Mrs. David-
son can speak six languages, al-
though she confines her comments
to the English language in her daily
broadcasts for women.

We Appreciate...

the very good effort put forth by the Fire
Department and many of the other citizens
during the recent fire.
